Query 3: My application crashes whenever I upload a file.

```
[Deepak]: My application crashes whenever i upload a file.

Processing your query...

[Agent Routing]: Technical
[Support Agent]: Thank you for reaching out to ABC Technologies Technical Support. I'd be happy to help you resolve the issue with your application crashing during file uploads.

To troubleshoot this problem, please follow these step-by-step instructions:

**Step 1: Verify File Size**
Check if the file size exceeds the maximum limit of 50 MB. If it does, try reducing the file size or splitting large files into smaller ones (under 10,000 rows each) for CSV files.

**Step 2: Check File Format**
Ensure that the file format is supported by our application. We only support PDF, PNG, JPG, JPEG, and CSV formats. If you're uploading a spreadsheet data, try converting XLS/XLSX to CSV format first.

**Step 3: Clear Browser Cache and Cookies**
Clear your browser cache and cookies, then retry the upload. This will help resolve any issues related to corrupted or outdated data in your browser.

**Step 4: Disable Browser Extensions**
Disable any browser extensions that may be blocking uploads. Some extensions can interfere with our application's functionality.

If none of these steps resolve the issue, please provide more details about the error message you're seeing and the file type you're trying to upload. This will help me further investigate and provide a more specific solution.

Let me know if you need any assistance or have questions about these steps. I'm here to help!
